

Buffalo Medical Group's MyBMGChart Available on iPhones

WILLIAMSVILLE, NY - Buffalo Medical Group patients can now view their MyBMGChart medical information on their iPhone! The secure application enables patients to access many of the features available on MyBMGChart such as test results, upcoming and past appointments, and messages and health reminders sent from their providers.

The app is available from the iPhone app store free of charge and can be accessed by clicking on the "App Store" icon, searching for "MyChart", and clicking on the icon→. Once the app is downloaded, patients just have to click the information button to find Buffalo Medical Group, and proceed to log in with the user ID and password they created when they signed up for MyBMGChart.

Buffalo Medical Group patients must have an active MyBMGChart account to use this app. If they do not have an account, they should contact their physician's office to request an access code.

The app requires an Apple iOperating system version 3.1.3 or later. As in the case of MyBMGChart, the iPhone app is secure and uses the highest standards to protect patient information.

More than 23,000 Buffalo Medical Group patients are now enrolled in MyBMGChart, the patient portal in BMG's electronic medical record system. It was unveiled in 2008 to enable the Group's patients to access their own health information from anywhere in the world using a password protected and secure internet connection.

Additional information about MyBMGChart is available on the Buffalo Medical Group web site at www.buffalomedicalgroup.com. Interested BMG patients also may call 630-1087.
