

Obtaining the software and creating a Skype Account

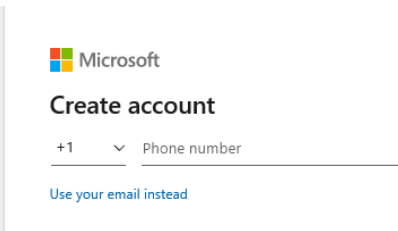

Skype is compatible with Windows PCs, Macs, iPhones and other smartphones, iPads and other tablets.

Skype for Windows PC's and Macs

1. To get Skype you need to create an account. To open an account, visit www.skype.com and Click "Sign in " in the upper right-hand corner.
2. Click "New to Skype? Sign Up " to create your account.

3. Choose how you want to log in. You'll see you have the choice to sign in with your mobile number or email address.

4. Once you decide how you want to log in to Skype, enter your information in the required fields, and you're ready for the next step.
5. Once you have a Skype account, you need to [visit the Skype download page](#), sign in with your account and the Skype download will start.
6. Follow the instructions on the download page (available after you sign-in as instructed above) to install Skype.
7. Once Skype is installed, on Windows PCs it will open automatically. On Macs you should drag it to your Applications folder, put the Skype icon on the Dock and launch it from there.
8. The first time Skype launches it will let you create an account. Since you've already created an account, skip this step by clicking Sign-In.
9. Sign-in with the Skype name and password you created earlier.

Skype for iPhones and other smartphones, iPads and other tablets.

1. Visit the app store on your phone or tablet and download the skype app.
2. If you do not have a skype account- select No account ? Create one.
3. Choose how you want to log in. You'll see you have the choice to sign in with your mobile number or email address,
4. Once you decide how you want to log in to Skype, enter your information in the required fields, and you're ready to skype.

If you need to flip your camera around - simply select the flipping camera icon from the toolbar on the top of the screen
